ITU, Inc. celebrates state wide award during safety month

(New Berlin, WI) — In support of June being National Safety Month, the Wisconsin Safety Council toured the state of Wisconsin to recognize this year's 15 corporate safety award winners. On June 22, the Wisconsin Safety Council presented ITU and its employees with the 2010 Corporate Safety Award

ITU was originally awarded the 2010 Corporate Safety Award at the Wisconsin Safety Council's Safety & Health Conference & Exposition on May 17, 2011. ITU's president, Jim Leef, was also recognized at the conference as the 2010 inductee into the Safety Hall of Fame.

Janie Ritter from the Wisconsin Safety Council presented the award. She noted, "A solid safety program saves time and money by increasing productivity while at the same time, reduces production down time. Both employers and employees remain loyal and dedicated to each other when they know they are each watching out for the other."

"Safety improvement is work that never ends." Jim Leef added. He describes that work as attention to detail, keeping up with technology, adjusting to evolving circumstances and adhering to safety principles.

"It is the collective efforts of everyone in the organization that makes ITU a safer and safer company, each and every day." he added.

ITU's continued efforts towards injury prevention have paid off. The company set and achieved increasingly aggressive safety goals including an injury rate less than half the industry average. This led to a lower Experience Modification Rating of 0.74 and worker's compensation losses that were less than half that in 1999. Additionally, the company's processing facility in Neenah, Wis. recently celebrated a safety milestone of four consecutive years without a lost time incident.

ITU, Inc. and AbsorbTech, LLC provide sustainable solutions to industry through floor care, garment, absorbent, first aid, safety and facility service programs. ITU has over 75 years of experience and service excellence in the industrial laundry business. For more information visit www.itu-at.com.
