Solvent recovery reporting assists Illinois and Indiana printers with air emissions regulations

(Elk Grove Village, IL) – ITU, Inc. can help printers in Indiana’s Lake and Porter County and in Illinois comply with emissions reporting requirements through customer-specific solvent recovery tracking.

“If a printer fits the size category, they will need to control their emissions with add-on technology to show a significant reduction in actual emissions,” Jodi Drew, ITU’s Environmental Engineer said. “Our solvent recovery reports can help them accurately calculate their actual emissions.”

ITU holds the patent on a process technology that allows solvent recovery tracking for each customer. Recovered solvent quantities from Sorblts® Ultra launderable, reusable high-performance printer towels are documented for customers to help meet regulatory reporting requirements for EPA and ISO 14001 objectives, among other regulatory initiatives. Sorblts® Ultra printer towels are heavy weight, lower-linting towels which provide greater absorbency while producing long-term environmental compliance and labor savings.

Prior to laundering, solvent-bearing Sorblts® Ultra printer towels are segregated and processed through a solvent recovery system. This technology achieves three important objectives. Solvent is recovered for reuse, not emissions into waste. Secondly, ITU’s process significantly reduces facilities’ air emissions. Solvent recovery also reduces liability through the reduction or elimination of solvent-bearing waste.

Solvent recovery reports provide process control and cost reduction information, accurate recovery documentation for reporting use and aid in tracking raw material use.

ITU, Inc. and AbsorbTech, LLC provide industrial, launderable products and services in the eastern half of the United States. Processing facilities in Wisconsin, Indiana and Pennsylvania utilize advanced processing systems for wastewater, VOC emissions and other environmental controls. AbsorbTech was the first laundry facility to achieve ISO 9001:2008 and 14001:2004 registrations in the U.S. ITU and AbsorbTech provide sustainable solutions through absorbent, towel, floor care, garment, first aid and safety, facility and direct purchase programs. ITU has over 75 years of experience and service excellence in the industrial laundry business. For more information visit www.itu-at.com
